ECOLOGICAL MODELLING

Contents of *Ecological Modelling*, Vol. 91

VOL. 91 NOS. 1–3 15 NOVEMBER 1996

The estimation of the Peruvian current ecosystem by a mathematical model of biosphere
V.F. Krapivin (Fryazino, Russian Federation) 1
Revealing dynamics of ecological systems from natural recordings
G. Boudjema and N.P. Chau (Paris, France) 15
Modelling composting as a microbial ecosystem: a simulation approach
J. Kaiser (Leipzig, Germany) 25
A simple modelling approach towards hydrochemical seasonality of major cations in a Central Amazonian floodplain lake
G.E. Weber, K. Furch and W.J. Junk (Plön, Germany) 39
An encounter rate model of bark beetle populations searching at random for susceptible host trees
J.A. Byers (Alnarp, Sweden). 57
A model for the development of the cabbage root fly (*Delia radicum* L.) based on the extended Leslie model
D. Söndgerath and W. Müller-Pietralla (Braunschweig, Germany) 67
A mathematical model for waste water stabilization ponds with macrophytes and microphytes
S. Moreno-Grau, A. García-Sánchez, J. Moreno-Clavel, J. Serrano-Aniorte (Cartagena, Spain) and M.D. Moreno-Grau (Madrid, Spain) 77
EMergy analysis perspectives of Thailand and Mekong River dam proposals
M.T. Brown (Gainesville, FL, USA) and T.R. McClanahan (Mombasa, Kenya) 105
Models of desert locust phase changes
J. Holt and R.A. Cheke (Chatham, UK) 131
Uncertainty analysis and validation of environmental models: the empirically based uncertainty analysis
L. Monte (Rome, Italy), L. Håkanson (Uppsala, Sweden), U. Bergström (Nyköping, Sweden), J. Brittain (Oslo, Norway) and R. Heling (Arnhem, Netherlands) 139
A general method to define confidence limits for model predictions based on validations
L. Håkanson (Uppsala, Sweden) 153
Development of a sediment redox potential model for the assessment of postdepositional metal mobility
S.S. Park (Kangwon-do, South Korea) and P.R. Jaffé (Princeton, NJ, USA) 169
Application of multivariate statistics in detecting temporal and spatial patterns of water chemistry in Lake George, New York
B. Momen, L.W. Eichler, C.W. Boylen and J.P. Zehr (Troy, NY, USA). 183
A multi-species, density-dependent matrix growth model to predict tree diversity and income in northern hardwood stands
C.R. Lin, J. Buongiorno (Madison, WI, USA) and M. Vasievich (East Lansing, MI, USA) 193
Spatial uncertainty analysis: propagation of interpolation errors in spatially distributed models
D.L. Phillips and D.G. Marks (Corvallis, OR, USA) 213
clue-cr: an integrated multi-scale model to simulate land use change scenarios in Costa Rica
A. Veldkamp and L.O. Fresco (Wageningen, Netherlands). 231
Modification of the random-search type II functional response equation for incorporation into simulation models
J.A. Morales-Ramos, B.C. Legaspi, Jr. and R.I. Carruthers (Weslaco, TX, USA) 249

The use of satellite NDVI data for the validation of global vegetation phenology models: application to the Frankfurt Biosphere Model
M.K.B. Lüdeke (Potsdam, Germany), P.H. Ramge and G.H. Kohlmaier (Frankfurt, Germany) 255
Spatial optimization of wildlife habitat
A. Nevo (Bet Dagan, Israel) and L. Garcia (Fort Collins, CO, USA) 271
Influence of environmental noises on the Gomatam model of interacting species
G.P. Samanta (Midnapore, India) 283

Short communication
High control measures cannot produce extinction in weed populations
J.L. Gonzalez-Andujar (Córdoba, Spain) 293
